SUHEL REHMAN M

QA Automation Engineer | Playwright + JavaScript | Selenium + Java

Coimbatore, Tamil Nadu, India | +91 93639 36983 | suhelcareers@gmail.com | linkedin.com/in/suhel-rehman-m

PROFESSIONAL SUMMARY

QA Automation Engineer with **4 years of experience** testing web, mobile, and API applications across **retail, banking, and education** domains. Currently building UI test automation with **Playwright and JavaScript** using Cucumber (BDD) and the Page Object Model for a multi-client retail merchandise planning platform. Previously developed **Selenium and Java** automation for a digital banking platform covering web UI, mobile (Appium), and REST APIs (Rest Assured), integrated with Jenkins CI/CD for nightly regression. Skilled in regression strategy, API and database validation, and defect root-cause analysis within Agile teams.

TECHNICAL SKILLS

▪ Playwright	▪ JavaScript (Node.js)	▪ Cucumber (BDD)
▪ Selenium WebDriver	▪ Java	▪ Page Object Model (POM)
▪ Appium (Mobile)	▪ TestNG / JUnit	▪ Data-Driven Testing
▪ Rest Assured	▪ Postman (API Testing)	▪ SQL / JDBC
▪ Jenkins (CI/CD)	▪ Maven	▪ Git / GitHub
▪ Jira	▪ Regression Testing	▪ Cross-Browser Testing
▪ Extent Reports	▪ Agile / Scrum	▪ STLC / SDLC

PROFESSIONAL EXPERIENCE

Automation Test Engineer

Feb 2026 – Present

S5 Stratos (Client) | Payroll: **Remunance**

Project: *Retail Merchandise Planning Platform* | ***Domain:*** *Retail* | ***Stack:*** *Playwright, JavaScript, Cucumber (BDD), POM, Jira*

- Build and maintain a **Playwright + JavaScript** UI automation framework using **Cucumber (BDD)** and the **Page Object Model** for a merchandise planning platform used by multiple retail clients.
- Own end-to-end **regression testing** for each release across client environments, prioritizing high-risk planning modules to protect release quality.
- Translate product requirements and user stories into Gherkin scenarios and acceptance criteria, flagging testability risks early with Product and Engineering.
- Design functional, regression, and integration test cases for core merchandise planning workflows and extend automation coverage each sprint.
- Log and track defects in **Jira** with clear reproduction steps; partner with developers on root-cause analysis and fix verification.
- Report automation coverage and release quality metrics to product and engineering stakeholders.

Automation Test Engineer

Aug 2024 – Jan 2026

Tech Mahindra (Client) | Payroll: **AU Tech**

Project: *AltBank Digital Banking Platform* | ***Domain:*** *Banking* | ***Stack:*** *Selenium, Java, Appium, Rest Assured, Cucumber, TestNG, Maven, Jenkins*

- Automated end-to-end testing across web, mobile, and API layers of a digital banking platform covering customer onboarding, fund transfers, loan processing, bill payments, and credit card management.
- Developed web UI automation with **Selenium WebDriver and Java** and mobile tests with **Appium** inside a **Cucumber (BDD)** framework integrated with **TestNG**.
- Automated business-critical workflows including fund transfers, loan approvals, account statements, and transaction history validation.
- Validated REST APIs with **Rest Assured** and **Postman** – status codes, JSON/XML responses, headers, and backend database consistency.

- Implemented **data-driven testing** with Excel and SQL data sources to broaden coverage across customer and transaction scenarios.
- Integrated the Maven-based suite with **Jenkins CI/CD** for nightly regression runs, reducing dependence on manual regression cycles.
- Published Extent Reports for each execution, triaged defects by severity and priority in Jira, and shared results with the QA lead and client.
- Trained new team members on the automation framework, coding standards, and best practices.

QA Analyst
Sep 2022 – Jul 2024

Focus Edumatics Pvt Ltd, Coimbatore

Project: *E-Learning & Assessment Platform* | ***Domain:*** *Education (EdTech)* | ***Stack:*** *Selenium, Java, TestNG, POM, SQL, JDBC, Git, Jira*

- Analyzed requirements for core e-learning modules – user management, course enrollment, study materials, assignments, online assessments, and performance tracking – and converted them into test scenarios and test cases.
- Built and executed web automation scripts using **Selenium WebDriver, Java, TestNG, and POM** for login, course navigation, assignment upload, exam submission, and grade tracking.
- Performed functional, UI, integration, compatibility, and system testing; logged defects in Jira with reproduction steps, screenshots, and severity.
- Validated backend data for enrollments, assignments, and exam results using **SQL**, and automated UI-to-database checks with **JDBC**.
- Maintained automation code in **Git** using feature branches, code reviews, and merge conflict resolution.
- Prepared daily and weekly execution reports, defect summaries, and sprint metrics for the QA lead and Scrum Master.

EDUCATION

MSc, Computer Science
2022 – 2024

Shri Nehru Maha Vidyalaya College of Arts and Science, Coimbatore | Completed alongside full-time employment

BSc, Computer Technology
2019 – 2022

Shri Nehru Maha Vidyalaya College of Arts and Science, Coimbatore
